

DEPARTMENT OF THE ARMY PERMIT

Permittee: Innovation Projects Group, LLC
10511 Six Mile Cypress Parkway, Suite 101
Fort Myers, Florida 33966

NOV 22 2013

Permit No: SAJ-2002-01683-(IP-MJD)

Issuing Office: U.S. Army Engineer District, Jacksonville

NOTE: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

You are authorized to perform work in accordance with the terms and conditions specified below.

Project Description: Discharge 139.069 cubic yards of fill into 43.10 acres of wetlands and 0.26 acre of waters (ditch) and excavate 31.492 cubic yards of material from 2.44 acres of wetlands to construct a commercial research park for a public/private development in association with Florida Gulf Coast University. The work described above is to be completed in accordance with the 12 pages of drawings [and 7 attachments] affixed at the end of this permit instrument.

Project Location: The project would affect waters of the United States associated with the Ten Mile Canal sub-watershed of the Estero Bay Frontal watershed that discharges to Estero Bay. The project site is located in Sections 06 & 07, Township 46 South, Range 26 East, Fort Myers, Lee County Florida

Directions to site: From Interstate 75 take exit 128 (Alico Road) east approximately 2.4 miles and turn north (left) onto Airport Haul Road. The project is on the right.

Approximate Central Coordinates: Latitude: 26.501224° North
Longitude: 81.752083° West

Permit Conditions

General Conditions:

1. The time limit for completing the work authorized ends on **22 November 2018**. If you find that you need more time to complete the authorized activity, submit your request for a time extension to this office for consideration at least one month before the above date is reached.

2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.

3. If you discover any previously unknown historic or archeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and State coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.

4. If you sell the property associated with this permit, you must obtain the signature and the mailing address of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.

5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is attached if it contains such conditions.

6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

Special Conditions:

1. **Reporting Address:** All reports, documentation and correspondence required by the conditions of this permit shall be submitted to the following address: U.S. Army Corps of Engineers, Regulatory Division, Enforcement Section, 1520 Royal Palm Square Blvd., Suite 310, Ft. Myers, FL 33919. The Permittee shall reference this permit number, SAJ-2002-01683-(IP-MJD), on all submittals.

2. **Commencement Notification:** Within 10 days from the date of initiating the authorized work, the Permittee shall provide to the Corps a written notification of the date of commencement of work authorized by this permit.

3. **Wetland Avoidance/Minimization Areas:** The Permittee shall avoid the remaining 89.75 acre(s) of onsite wetlands, (**Attachment 1**/as detailed on Drawings 5 through 10 of 12). These natural wetland areas were avoided as part of the permit application review process and therefore will not be disturbed by any dredging, filling, mechanized land clearing, agricultural activities, or

other construction work whatsoever. The Corps reserves the right to deny review of any requests for future impacts to these natural wetland areas.

4. Erosion Control: Prior to the initiation of any work authorized by this permit, the Permittee shall install erosion control measures along the perimeter of all work areas to prevent the displacement of fill material outside the work area. Immediately after completion of the final grading of the land surface, all slopes, land surfaces, and filled areas shall be stabilized using sod, degradable mats, barriers, or a combination of similar stabilizing materials to prevent erosion. The erosion control measures shall remain in place and be maintained until all authorized work has been completed and the site has been stabilized.

5. Cultural Resources/Historic Properties:

a. No structure or work shall adversely affect impact or disturb properties listed in the National Register of Historic Places (NRHP) or those eligible for inclusion in the NRHP.

b. If during the ground disturbing activities and construction work within the permit area, there are archaeological/cultural materials encountered which were not the subject of a previous cultural resources assessment survey (and which shall include, but not be limited to: pottery, modified shell, flora, fauna, human remains, ceramics, stone tools or metal implements, dugout canoes, evidence of structures or any other physical remains that could be associated with Native American cultures or early colonial or American settlement), the Permittee shall immediately stop all work and ground-disturbing activities within a 100-meter diameter of the discovery and notify the Corps within the same business day (8 hours). The Corps shall then notify the Florida State Historic Preservation Officer (SHPO) and the appropriate Tribal Historic Preservation Officer(s) (THPO(s)) to assess the significance of the discovery and devise appropriate actions.

c. Additional cultural resources assessments may be required of the permit area in the case of unanticipated discoveries as referenced in accordance with the above Special Condition ; and if deemed necessary by the SHPO, THPO(s), or Corps, in accordance with 36 CFR 800 or 33 CFR 325, Appendix C (5). Based, on the circumstances of the discovery, equity to all parties, and considerations of the public interest, the Corps may modify, suspend or revoke the permit in accordance with 33 CFR Part 325.7. Such activity shall not resume on non-federal lands without written authorization from the SHPO for finds under his or her jurisdiction, and from the Corps.

d. In the unlikely event that unmarked human remains are identified on non-federal lands, they will be treated in accordance with Section 872.05 Florida Statutes. All work and ground disturbing activities within a 100-meter diameter of the unmarked human remains shall immediately cease and the Permittee shall immediately notify the medical examiner, Corps, and State Archeologist within the same business day (8-hours). The Corps shall then notify the appropriate SHPO and THPO(s). Based, on the circumstances of the discovery, equity to all parties, and considerations of the public interest, the Corps may modify, suspend or revoke the

permit in accordance with 33 CFR Part 325.7. Such activity shall not resume without written authorization from the State Archeologist and from the Corps.

6. Mitigation Credit Purchase: Within 30 days from the date of initiating the authorized work the Permittee shall provide verification to the Corps that 6.0 federal mitigation bank credits have been purchased from the Panther Island Mitigation Bank (SAJ-1997-06400). The required verification shall reference this project's permit number (SAJ-2002-01683).

7. Compensatory Mitigation: Within 6 months from the date of initiating the authorized work the Permittee shall complete the following mitigation objectives in accordance with the approved compensatory mitigation plan (**Attachment 3**) as detailed on Drawings 5 through 10 of 12:

a. Onsite Mitigation

(1) Wetland Enhancement: Manually remove Category I and II invasive exotic plant species from 89.75 acres of wetlands.

(2) Upland and Wetland Preservation: Manually remove Category I and II invasive exotic plant species from 6.82 acres of upland and upland buffer.

b. Offsite Mitigation

(1) Wetland Enhancement: Manually remove Category I and II invasive exotic plant species from 297.00 acres of wetlands

These onsite and offsite compensatory mitigation areas shall be preserved in perpetuity in accordance with the **Conservation Easement** Special Condition of this permit.

8. Performance Standards: To meet the objectives of the approved compensatory mitigation plan, the Permittee shall achieve the following performance standards:

a. At least 80 percent cover by appropriate wetland species (i.e., FAC or wetter).

b. Cover of Category I and II invasive exotic plant species, pursuant to the most current list established by the Florida Exotic Pest Plant Council at <http://www.fleppc.org>, and the nuisance species, dogfennel (*Eupatorium capillifolium*), Bermudagrass (*Cynodon* spp.), Bahiagrass (*Paspalum notatum*), and cattail (*Typha* spp.), shall total less than 5 percent.

c. Less than 20 percent mortality of planted wetland species.

The Permittee shall achieve the above performance standards by the end of the 5-year monitoring period, with no maintenance during the 5th year of monitoring. The wetlands areas must meet

the performance standards for a minimum of three (3) consecutive years following any supplemental planting. Any required supplemental planting should occur prior to the second year of maintenance to meet the requirement for three consecutive years of success prior to release from monitoring requirements. During the 3rd and 4th year of maintenance, removal of nuisance and exotic vegetation is permitted with no artificial manipulation of hydrology but no supplemental planting is permitted to meet the performance standards (80% coverage of desirable native plant species, less than 5% total coverage of Category I and II invasive exotic plant species). During the 5th year of maintenance/monitoring no maintenance should be required. In the event that the above performance standards have not been achieved, the Permittee shall undertake a remediation program approved by the Corps in accordance with the **Remediation** Special Condition of this permit.

9. Monitoring and Reporting Timeframes: To show compliance with the performance standards the Permittee shall complete the following:

- a. Perform a time-zero monitoring event of the wetland mitigation area(s) within 60 days of completion of the compensatory mitigation objectives identified in the **Compensatory Mitigation** Special Condition of this permit.
- b. Submit the time-zero report to the Corps within 60 days of completion of the monitoring event. The report will include at least one paragraph depicting baseline conditions of the mitigation site(s) prior to initiation of the compensatory mitigation objectives and a detailed plan view drawing of all created, enhanced and/or restored mitigation areas.
- c. Subsequent to completion of the compensatory mitigation objectives, perform semi-annual monitoring of the wetland mitigation areas for the first 3 years and annual monitoring thereafter for a total of no less than 5 years of monitoring.
- d. Submit annual monitoring reports to the Corps within 60 days of completion of the monitoring event. Semi-annual monitoring will be combined into one annual monitoring report.
- e. Monitor the mitigation area(s) and submit annual monitoring reports to the Corps until released in accordance with the **Mitigation Release** Special Condition of this permit.

10. Reporting Format: Annual monitoring reports shall follow a 10-page maximum report format for assessing compensatory mitigation sites. The Permittee shall submit all documentation to the Corps on 8½-inch by 11-inch paper, and include the following:

- a. Project Overview (1 Page):
 - (1) Department of the Army Permit Number

- (2) Name and contact information of Permittee and consultant
 - (3) Name of party responsible for conducting the monitoring and the date(s) the inspection was conducted
 - (4) A brief paragraph describing the purpose of the approved project, acreage and type of aquatic resources impacted, and mitigation acreage and type of aquatic resources authorized to compensate for the aquatic impacts.
 - (5) Written description of the location, any identifiable landmarks of the compensatory mitigation project including information to locate the site perimeter(s), and coordinates of the mitigation site (expressed as latitude, longitudes, UTMs, state plane coordinate system, etc.).
 - (6) Dates compensatory mitigation commenced and/or was completed
 - (7) Short statement on whether the performance standards are being met
 - (8) Dates of any recent corrective or maintenance activities conducted since the previous report submission
 - (9) Specific recommendations for any additional corrective or remedial actions.
- b. Requirements (1 page): List the monitoring requirements and performance standards, as specified in the approved mitigation plan and special conditions of this permit, and evaluate whether the compensatory mitigation project site is successfully achieving the approved performance standards or trending towards success. A table is a recommended option for comparing the performance standards to the conditions and status of the developing mitigation site.
- c. Summary Data (maximum of 4 pages): Summary data should be provided to substantiate the success and/or potential challenges associated with the compensatory mitigation project. Photo documentation may be provided to support the findings and recommendations referenced in the monitoring report and to assist the PM in assessing whether the compensatory mitigation project is meeting applicable performance standards for that monitoring period. Submitted photos should be formatted to print on a standard 8 ½" x 11" piece of paper, dated, and clearly labeled with the direction from which the photo was taken. The photo location points should also be identified on the appropriate maps.
- d. Maps and Plans (maximum of 3 pages): Maps shall be provided to show the location of the compensatory mitigation site relative to other landscape features, habitat types, locations of photographic reference points, transects, sampling data points, and/or other features pertinent to the mitigation plan. In addition, the submitted maps and plans should clearly delineate the

mitigation site perimeter(s). Each map or diagram should be formatted to print on a standard 8 1/2" x 11" piece of paper and include a legend and the location of any photos submitted for review. As-built plans may be included.

e. **Conclusions (1 page):** A general statement shall be included that describes the conditions of the compensatory mitigation project. If performance standards are not being met, a brief explanation of the difficulties and potential remedial actions proposed by the Permittee or sponsor, including a timetable, shall be provided. The District Commander will ultimately determine if the mitigation site is successful for a given monitoring period.

11. Remediation: If the compensatory mitigation fails to meet the performance standards 5 years after completion of the compensatory mitigation objectives, the compensatory mitigation will be deemed unsuccessful. Within 60 days of notification by the Corps that the compensatory mitigation is unsuccessful, the Permittee shall submit to the Corps an alternate compensatory mitigation proposal sufficient to create the functional lift required under this permit. The alternate compensatory mitigation proposal may be required to include additional mitigation to compensate for the temporal loss of wetland function associated with the unsuccessful compensatory mitigation activities. The Corps reserves the right to fully evaluate, amend, and approve or reject the alternate compensatory mitigation proposal. Within 120 days of Corps approval, the Permittee will complete the alternate compensatory mitigation proposal.

12(a). Mitigation Release: The Permittee's responsibility to complete the required compensatory mitigation, as set forth in the **Compensatory Mitigation** Special Condition of this permit will not be considered fulfilled until mitigation success has been demonstrated and written verification has been provided by the Corps. An on-site mitigation area which has been released will require no further monitoring or reporting by the Permittee; however the Permittee, Successors and subsequent Transferees remain perpetually responsible to ensure that the mitigation area(s) remain in a condition appropriate to offset the authorized impacts in accordance with General Condition 2 of this permit.

12(b). The Permittee must request a permit modification prior to release from monitoring of the off-site mitigation area. The Corps must request re-initiation of formal consultation with the FWS to approve the long-term maintenance funding amount, mechanism and entity prior to implementation. The permittee should submit a request for a permit modification to the Corps that includes a complete, written proposal for transfer of responsibility of the off-site proposal to allow the Corps sufficient time to complete formal consultation with the FWS. The permittee shall continue to monitor and submit monitoring reports for the off-site mitigation area until the Corps and FWS approve transfer of perpetual responsibility for the off-site mitigation area.

13. As-Built: Within 60 days of completion of the authorized work or at the expiration of the construction authorization of this permit, whichever occurs first, the Permittee shall submit as-built drawings of the authorized work and a completed As-Built Certification Form (**Attachment**

4) to the Corps. The drawings shall be signed and sealed by a registered professional engineer and include the following:

a. A plan view drawing of the location of the authorized work footprint (as shown on the permit drawings) with an overlay of the work as constructed in the same scale as the attached permit drawings (8½-inch by 11-inch). The drawing should show all "earth disturbance," including wetland impacts, water management structures, and any on-site mitigation areas.

b. List any deviations between the work authorized by this permit and the work as constructed. In the event that the completed work deviates, in any manner, from the authorized work, describe on the As-Built Certification Form the deviations between the work authorized by this permit and the work as constructed. Clearly indicate on the as-built drawings any deviations that have been listed. Please note that the depiction and/or description of any deviations on the drawings and/or As-Built Certification Form does not constitute approval of any deviations by the U.S. Army Corps of Engineers.

c. The Department of the Army Permit number.

d. Include pre- and post-construction aerial photographs of the project site, if available.

14. **Notice of Permit:** The Permittee shall complete and record the Notice of Department of the Army Permit (**Attachment 5**) with the Clerk of the Circuit Court, Registrar of Deeds or other appropriate official charged with the responsibility of maintaining records of title to or interest in real property within the county of the authorized activity. Within 90 days from the effective date of this permit the Permittee shall provide a copy of the recorded Notice of Permit to the Corps clearly showing a stamp from the appropriate official indicating the book and page at which the Notice of Permit is recorded and the date of recording.

15. **Conservation Easement:** The Permittee shall have a legally sufficient conservation easement prepared to ensure to the Corps' satisfaction that the areas referenced in the **Compensatory Mitigation** Special Condition will remain in their natural state in perpetuity. The conservation easement for the on-site preserve will encompass approximately 82.75 acre(s) of wetlands and 6.82 acre(s) of uplands. The conservation easement for the off-site preserve will encompass approximately 297 acres(s) of wetlands. These natural preserve areas will not be disturbed by any dredging, filling, land clearing, agricultural activities, planting, or other construction work whatsoever except as required or authorized by this permit. The Permittee agrees that the only future utilization of the preserved areas in question will be as a purely natural area. To show compliance with this condition the Permittee shall complete the following:

a. Within 30 days from the date of initiating the authorized work submit to the Corps the draft conservation easement documents with a legal description, survey, and scale drawings, of the

PERMIT NUMBER: SAJ-2002-01683
PERMITTEE: INNOVATIONS PROJECTS GROUP, LLC
PAGE 9 of 15

areas in question. The Corps shall have all rights of the Grantee in the conservation easement. The following paragraph shall be incorporated in the conservation easement document:

“Rights of U.S. Army Corps of Engineers (Corps)- The Corps shall be a party to any modification, alteration, release, or revocation of the conservation easement, and shall review and approve as necessary any additional structures or activities that require approval.”

b. Within 30 days of Corps’ approval of the draft conservation easements, record the easements in the public records of Lee and Collier County, Florida. A certified copy of the recorded document, plat, and verification of acceptance from the grantee shall be forwarded to the Corps within 60 days of Corps’ approval of the draft conservation easements.

c. Within 30 days from the date of initiating the authorized work submit to the Corps a title insurance commitment with the draft conservation easement documents, IN FAVOR OF THE GRANTEE, for the property which is being offered for preservation to show that the Permittee has clear title to the real property and can legally place it under a conservation easement. Any existing liens or encumbrances on the property shall be subordinated to the conservation easement. At the time of recordation of the conservation easements, a title insurance policy shall be provided to the Corps in an amount equal to the current market value of the properties.

d. In the event this permit is transferred, proof of delivery of a copy of the recorded conservation easements to the subsequent Permittee or Permittees shall be submitted to the Corps together with the notification of permit transfer.

The Grantee shall not assign its rights or obligations under this conservation easements except to another organization qualified to hold such interests under the applicable state and federal laws, including §704.06 Florida Statutes, and committed to holding this conservation easement exclusively for conservation purposes. The Corps shall be notified in writing of any intention to reassign the conservation easements to a new grantee and shall approve the selection of the grantee. The new grantee shall accept the assignment in writing and a copy of this acceptance delivered to the Corps. The conservation easement shall then be re-recorded and indexed in the same manner as any other instrument affecting title to real property and a copy of the recorded conservation easement furnished to the Corps.

16. Biological Opinion: This Corps permit does not authorize the Permittee to take an endangered species, in particular the Florida panther. In order to legally take a listed species, the Permittee must have separate authorization under the Endangered Species Act (ESA) (e.g., an ESA Section 10 permit, or a BO under ESA Section 7, with “incidental take” provisions with which the Permittee must comply). The enclosed February 9 2007 US Fish and Wildlife Service (FWS) Biological Opinion (BO) and two (2) amendments (dated July 23, 2007 and May 9 2013)(Attachment 6) contains mandatory terms and conditions to implement the reasonable and

prudent measures that are associated with "incidental take" that is also specified in the BO. Authorization under this Corps permit is conditional upon compliance with all of the mandatory terms and conditions associated with incidental take of the attached BO, which terms and conditions are incorporated by reference in this permit. Failure to comply with the terms and conditions associated with incidental take of the BO, where a take of the listed species occurs, would constitute an unauthorized take, and it would also constitute non-compliance with this Corps permit. The FWS is the appropriate authority to determine compliance with the terms and conditions of its BO, and with the ESA.

17. Eastern Indigo Snake Protection Measures: The Permittee shall comply with U.S. Fish and Wildlife Service's "Standard Protection Measures for the Eastern Indigo Snake" dated August 12, 2013 and provided in **Attachment 7** of this permit."

18. Fill Material: The Permittee shall use only clean fill material for this project. The fill material shall be free from items such as trash, debris, automotive parts, asphalt, construction materials, concrete block with exposed reinforcement bars, and soils contaminated with any toxic substance, in toxic amounts in accordance with Section 307 of the Clean Water Act.

19. Regulatory Agency Changes: Should any other regulatory agency require changes to the work authorized or obligated by this permit, the Permittee is advised that a modification to this permit instrument is required prior to initiation of those changes. It is the Permittee's responsibility to request a modification of this permit from the Ft. Myers Regulatory Office.

20. Financial Assurances: Within 60 calendar days of the Corps' determination that the mitigation is successful in accordance with Special Condition #7(b), the Permittee will provide documentation of the escrow funds to ensure long-term management of the 297 acres of preserved lands. The amount of the endowment fund required for the 297-acre off-site preserve will be determined at the time the mitigation has been deemed successful and will be based on the perpetual maintenance and monitoring needs as determined and approved through coordinated discussions with the land recipient, the Corps and the FWS. The monies generated from the non-wasting endowment funds must be sufficient to fund all land management costs, including: site fencing and fire break maintenance, taxes (if a non-government recipient), liability insurance (if site access is proposed and if non-governmental), site maintenance and monitoring actions, corresponding monitoring reports, escrow holder handling fee, and a ten (10) percent contingency category. To make the fund non-wasting, a capitalization rate will be determined by the permittee and approved by the Corps in consultation with the FWS at the time the property enters into a long-term maintenance phase. If the property is transferred to a third party for the long-term maintenance, the applicant will be required to obtain a Department of the Army permit modification and prior approval from the FWS.

PERMIT NUMBER: SAJ-2002-01683
PERMITTEE: INNOVATIONS PROJECTS GROUP, LLC
PAGE 11 of 15

Further Information:

1. Congressional Authorities: You have been authorized to undertake the activity described above pursuant to:

() Section 10 of the Rivers and Harbors Act of 1899
(33 U.S.C. 403).

(X) Section 404 of the Clean Water Act (33 U.S.C. 1344).

() Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413).

2. Limits of this authorization.

a. This permit does not obviate the need to obtain other Federal, State, or local authorizations required by law.

b. This permit does not grant any property rights or exclusive privileges.

c. This permit does not authorize any injury to the property or rights of others.

d. This permit does not authorize interference with any existing or proposed Federal projects.

3. Limits of Federal Liability. In issuing this permit, the Federal Government does not assume any liability for the following:

a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.

b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.

c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.

d. Design or construction deficiencies associated with the permitted work.

e. Damage claims associated with any future modification, suspension, or revocation of this permit.

PERMIT NUMBER: SAJ-2002-01683
PERMITTEE: INNOVATIONS PROJECTS GROUP, LLC
PAGE 12 of 15

4. **Reliance on Applicant's Data:** The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

5. **Reevaluation of Permit Decision:** This office may reevaluate its decision on this permit at any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to, the following:

- a. You fail to comply with the terms and conditions of this permit.
- b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (see 4 above).
- c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

6. **Extensions:** General Condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a reevaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit.
